

Patent Number 6,372,024

Bubble-Up® Radon

The Bubble-Up® Interactive™ removes radon from water and includes safety features such as meter control and alarms for vent obstruction, high water, and leaks, even during power outages.

Benefits

- The Bubble-Up® Interactive™ removes harmful radon from water and has built in safety features to ensure the unit is working correctly.

Required Conditions

- No backwashing required
- Influent water must be iron and manganese free*
- 5 micron sediment cartridge pre-filter required

Removal Process

- Water is aerated and blown into the inside tank. Radon is bubbled up and out. Clean water overflows the rim of the inner tank and a built-in pump automatically delivers clean water to the home.

*May Require Application Engineering

Standard Equipment

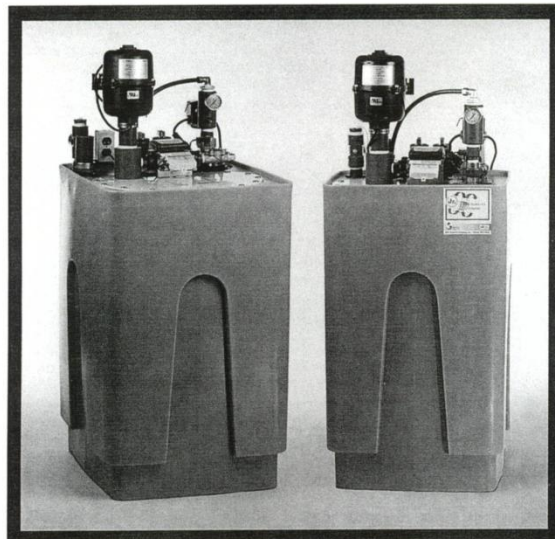

- Bypass valve
- Bubble-Up® Tank
- Triple back up water alarm valve: battery back up, float back up, solenoid back up with motorized ball valve
- Triple safety water alarm valve: overflow water stop, leak water stop, plugged vent water stop
- Digital flow meter
- Pressure gauge
- Flow direction arrows
- Status lights indicate when to change battery
