

# Crystalizer™ Scale Prevention

The Crystalizer™ Scale Prevention is a natural water treatment system that uses a scale prevention media for hard water conditions and is salt free, maintenance free, and requires no backwash or regeneration

**Benefits of Scale Prevention:**

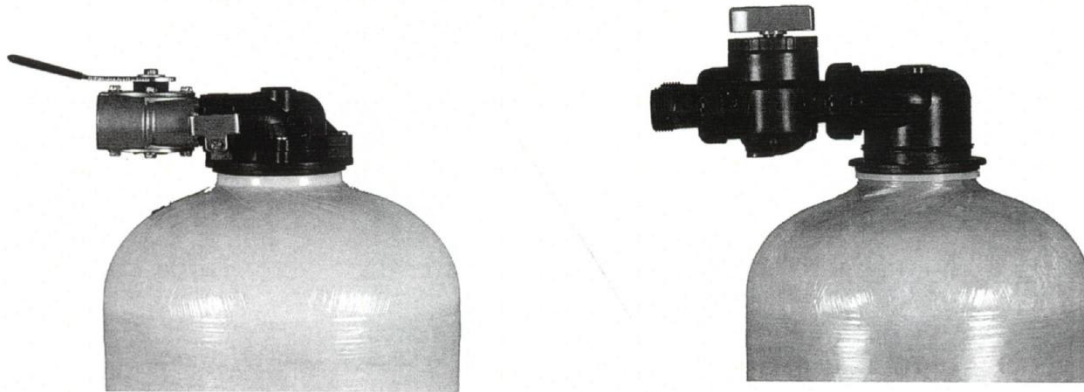

- Vitamins are preserved
- No backwashing valve required
- No salt required, chemical free
- Environmentally friendly
- Eliminates existing scale
- Reduces soap and chemical consumption

**Standard Equipment Includes:**

- 1" Bypass
- Full 1" Internal Piping
- Upper distributor basket
- Mineral Tank
- Vision or AquaBubble™ In/Out Head

**Treatment Process:**

- Water flows up through scale prevention media, SP3 converting hardness to a crystal
- Works effectively on water having a pH of 7.0 or greater, can be combined with an acid neutralizer to raise pH\*
- Works for 0-25 grain per gallon water
